SECTION 1	
INTRODUCTION	
	17
SECTION 2	
THE ADMINISTRATIVE REGIONS OF GREECE AND THEIR ECONOMICALLY ACTIVE POPULATIONS	
i. The territory and the regional organization of the country	21
ii. The evolution of the regional economically active population figures between the first quarters of 1998 and 2007	26
SECTION 3	
THE 2001 CENSUS: THE CHARACTERISTICS AND PARTICIPATION PATTERNS OF LOCAL POPULATIONS	
i. Population distribution.....	38
ii. Gender and age structure	41
iii. Formal qualifications	43
iv. Workforce participation	50
v. Sector concentration	67
vi. Professional concentrations	75
vii. Delineation of the labor markets of Greece.....	81
SECTION 4	
BUILDING A MODEL	
	94
i. Explaining economic participation in terms of spatial and non-spatial factors	95
ii. Reshaping the expression to resolve data-related and econometric issues	98
iii. The construction of a territorial specification through the use of the error terms	104
iv. The approach departs from the spatial autocorrelation genre.....	106
v. The spatial dummies recovered via this process.....	108

SECTION 5		
ECONOMETRIC ANALYSIS		113
i.	Estimates originating from the regional organization of the country	115
ii.	Estimates originating from the prefectorial organization of the country	125
iii.	Estimates originating from the micro-regional and distinct community characteristics.....	133
iv.	Analyzing the population shares of women aged 10 years and older in employment.....	139
v.	Analyzing the population shares of men aged 10 years and older in employment.....	142
vi.	Analyzing the population shares of women aged 10 years and older in unemployment.....	145
vii.	Analyzing the population shares of men aged 10 years and older in unemployment.....	147
viii.	Analyzing the population shares of women aged 10 years and older outside the workforce.....	149
ix.	Analyzing the population shares of men aged 10 years and older outside the workforce	151
x.	Spatial effects and territorial development policy discussion.....	152
xi.	The other effects and policy discussion	166
SECTION 6		
CONCLUSIONS AND POLICY PROPOSALS		171

3.1	Overall gender and age structure in 2001	42
3.2	Qualifications by gender (ages 15 and older) in 2001	47

TABLES

2.1	Regional population (N), employment (E), and unemployment (U) figures of those aged 15 and older between 1998.I and 2007.I.....	21
2.2	Estimates with robust standard errors of the regional population (N) functions of all persons aged 15 and older between 1998.I and 2007.I	29
2.3	Estimates with robust standard errors of regional employment (E): all persons aged 15 and older between 1998.I and 2007.I	30
2.4	Estimates with robust standard errors of regional unemployment (U): all persons aged 15 and older between 1998.I and 2007.I	31
2.5	Estimates with robust standard errors of regional non-participants (NP) aged 15 and older between 1998.I and 2007.I	32
2.6	Correlations of the short-period (P) and residual (u) components of the employment, unemployment, and non-participation figures of the regional populations aged 15 and older between 1998.I and 2007.I, recovered from the calculations of Tables 2.3-2.5.....	34
3.1	Stylized facts of Greek municipalities, 2001.....	39
3.2	Distribution of men and women aged 15 and older according to educational level, 2001.....	47
3.3	The distribution of Greek municipalities by type of the highest level of educational attainment held by male (M) and female (F) residents aged 15 and older, 2001	48
3.4	Educational attainment and economic activity among those aged 15 and older across Greece's 1,034 urban and rural municipalities, 2001	49
3.5a	Employment characteristics of those aged 10 or more out of 1,000 residents aged 10 and older, in 2001	51
3.5b	Employment characteristics of those aged 10 or more out of 1,000 residents aged 10 and older, in 2001	68
3.6	Correlations among the sector-shares of the employed local populations aged 15 and older across Greece's 1,013 municipalities with over 150 inhabitants in 2001	75

- 3.7 Correlations among the profession-shares of the employed local populations aged 15 and older across Greece’s 1,013 municipalities with over 150 inhabitants in 2001 81
- 3.8 The regional distribution of LMAs and single municipalities with less than 20 thousand inhabitants 93
- 5.1 The seemingly unrelated system of male and female employment, unemployment, non-participation regressions of all persons aged 10 years and older at the regional level, across Greece’s 1,034 municipalities (*2001 Census*) 116
- 5.2 The seemingly unrelated system of male and female employment, unemployment, non-participation regressions of all persons aged 10 years and older at the prefectorial level, across Greece’s 1,034 municipalities (*2001 Census*) 126
- 5.3 The seemingly unrelated system of male and female employment, unemployment, non-participation regressions of all persons aged 10 years and older at the micro-regional level, across Greece’s 1,034 municipalities (*2001 Census*) 134
